RE: On-Site Field Management Change at the NL/Taracorp Site

Dear Brad:

As we discussed on June 28, 1999, Doug Davenport has left this project for another ENTACT project in northwestern Indiana. Doug has been replaced by Greg Parker, who has been leading the field crew prior to Doug's departure. Greg is a highly experienced project manager and equipment operator, as his attached resume demonstrates.

I have discussed this management change with the Army Corps, and they have voiced no concerns over this change. Should you have any questions were concerns regarding this staffing change, please do not hesitate to contact me at (618) 876-7216.

Respectfully Submitted,

Richard A. Wood II
ENTACT
